| | | working practices. | | | | |
| Poor posture when working - may suffer musculoskeletal injuries, e.g. back pain, neck or shoulder injuries and pain or discomfort in feet and legs | Employee | <ul style="list-style-type: none"> • Height-adjustable client seats that are easy to adjust and can be turned around. The client's position determines the working height and thus the working posture of the hairdresser. Therefore, it is important that the client's seat can be adjusted to enable hairdressers of different heights to work in an upright posture. The seat should be stable and preferably have a flat ground plate that enables standing on them. • Using washbasins that are not too deep and long (front-back) with sufficient space for the feet and knees under the basin to enable the hairdresser to stand close to the client's head in order to minimise reaching distances and prevent bending postures. • Where required cutting stools provided for employees to reduce the duration of standing task performance and of bending the back. • Adequate space to enable movement of hairdressers cutting stools around the client. • Using sharp scissors with a little finger rest to reduce and improve the division of the force needed. • Using good, solid shoes without heels, to enable a good working posture, prevent backache and increase grip. • Work arranged to allow short breaks to be provided throughout the day. • Training and educating the staff in the application of risk reduction measures, e.g. using the available means to optimise their working posture (adjusting the height of client seats), improving their working posture (keeping the elbows low), taking sufficient breaks, etc. • A reasonable temperature is maintained. • Employees to report any aches and pains to their manager. | | | | |
| Electricity – electrical shocks, fire, burns. Electrical appliances subjected to considerable wear and | Employees Clients Contractors Visitors | <ul style="list-style-type: none"> • Fixed electrical installation inspected every five years by a competent contractor – arranged by Head Office. Remedial work completed as required and paperwork held by Head Office. | | | Due 17/05/2028 | |

| Hazards Identified | Who might be harmed | Measures to Control Risk | Further action required <i>(To ensure Measures to Control Risk are in place)</i> | Action Plan | | |
